The contractor must submit a completed **DBE Schedule C & Intent to Perform (Hauling)** form with their bid submission when utilizing subcontractors for trucking and hauling services. <u>The form will be completed and signed by the</u> <u>Contractor.</u>

The contractor may count towards the DBE goal hauling or trucking services provided by the DBE. The DBE must be responsible for the management and supervision of the entire trucking operation for which it is responsible on the contract, and there cannot be a contrived arrangement for the purpose of meeting the DBE goals. The DBE must itself own and operate at least one fully licensed, insured, and operational truck used on the contract. A DBE that leases a truck must show proof or evidence that the DBE has exclusive use of and control over the truck. This does not preclude the leased truck from working for others during the term of the lease with the consent of the DBE, so long as the lease gives the DBE absolute priority for use of the leased truck. Leased trucks must display the name and identification number of the DBE.

<u>Reference Exhibit D, Section 3 (Credit Towards The Contract Goal), Part h, which addresses how the contractor</u> <u>may count towards the DBE goal when using a DBE for hauling or trucking services.</u>

Disclaimer: If you are completing this as a result of an active contract or procurement, ensure that the purchaser, contract administrator, and/or project manager are copied.
